Play this game in a room wich keeps the sound inside,
you will die, and scream because of it,
but you wanna beat the level you struggle with
Everything has bin placed very well in the maps, well enough to trick you over and over again XD

<https://www.youtube.com/watch?v=xIv2ww330qA>. far too hard. sooper dooper cool. THIS GAME SUCKS.

The popular 'maso-core' platformer design is slowed down into to an utter crawl. Ladders replace wall jumping, run has been removed and slow slippery platforms require long waiting periods.

The lack of visual polish is apparent with VFX and most animations being absent too.. Blatant carbon copy of Super Meat Boy without the polish, charm, or quality.
Numerous issues including collision, audio resets, and lack of full controller support.
Art is inconsistent and seems to consist more of placeholders than original artwork.
There's a turtle model that looks like it came straight from a Google search.

Do not buy this game.
