About This Game

Be A Crane Master

Have you ever seen a crane operator and thought that you would have done the same, seeing the world from bird's eye view and touching the clouds? Now you've got such an opportunity!

Play as a real crane operator and put the container in the appropriate place. In each round you will have to put one container in the indicated place. You don't have much time! The higher level you achieve, the faster time goes and the less time you have to move the containers.

To make a bigger impression on you, we've decided to move our game to virtual reality. You will have an opportunity not only to experience what the crane operator normally does but also to look at the world from the perspective of 72-metres machine. If you have a fear of heights, be careful - you can feel a little bit dizzy.

Use Vive controllers to control a crane and an elevator that will take you to the top of the vehicle. Be precise and try to not fall - in virtual reality losing can be very painful!

Best music game I've played since [The Impossible Game](#).

[I would recommend it to anyone who likes those up-to-the-beat type of games. You get to play 4 levels \(as of March 2019\) with increasing difficulty. The objective is to dodge colored blocks while proceeding forward. Once you learn the core mechanics and are able to move around in different situations that's where the fun begins, because the music plays in sync with the level, most of the time. It's not an easy game, so you will fail a lot. But fear not, you will keep trying and finish the level so you can finally loop the whole song. I guess from that point is where the addiction kicks in. Enjoy it.](#)

[My ratings to this as a general game:](#)

[Graphics: N/A](#)

[Visual Design: 4/5](#)

[Gameplay: 5/5](#)

[Control Experience: 4.5/5](#)

[Sound Design: 4/5](#)

[Level Design: 4.5/5 \(level 1 - 3.5/5 level 2 - 4/5 level 3 - 4.5/5 level 4 - 5/5\)](#)

[as a music game:](#)

[Music Synchronization: 4/5](#)

[Dodge Mechanics: 4.5/5 The mechanic that drags the player to the center of screen seems fair, but I struggled a long time to learn and master it.](#)

[Suggestions:](#)

[- The up-down direction is controlled by WS keys with the middle finger while the left-right direction is controlled by AD keys, each with one finger, which means to move up and down for a given distance requires more time than to move left and right because the player needs to rapidly switch between keys with the middle finger for up and downs but not for left and rights, resulting a slight delay in the controlling process. This slight effect can be exaggerated in level 4 where vertical obstacles are close to one another and the timing is really demanding. \(I failed most of the time in level 4 during those up and down sequences.\) Please take this into consideration in your future level design. Maybe you could allow more spaces between vertical obstacles than horizontal ones to make up that input delay mentioned above. Or add mouse input.. --DO NOT BUY--](#)

[The conceptions are ok, but the platform, the controls are a terrible crap. Highlighting the 3D world and the graphics: you can't see the \u2665\u2665\u2665\u2665 in enemies and the traps because every single little shitty pixel is only red and white and the jumping in this freakin 3D world is IMPOSSIBLE! You will lose your orientation. And the worst of all there is no updates. --DO NOT BUY--](#)

[. This game needs a lot of work. The animations are bad or nonexistent. Movement is clunky. The view is restrictive would be better a little more zoomed out. You die from 1 hit so i dunno why there is a health bar or the heal thing. The video of the game looked fun but the game, well its more fun to watch the video at this point. Overall this doesnt feel like a complete game.. Just dont play this game. This game is pretty good. It is very fun and the soundtrack is amazing. One of the problems for me was the layout of the controls, but at least you can re-bind them.](#)

Draugen is nothing but a boring story about an american who lost his sister and his demons of being persistently obsessed by her disappearance. This could have been so much more, It tries to be mysterious and scary, but it fails in every aspect. It is simply too kind and linear in its way of telling an already boring story where all you do is look for clues to what happened to the people in this desolate place (By looking, I mean, look for the white ring popup and click them all. The title have nothing to do with the story and even his lost sister does not quite fit in with what happened to the residents that have mysteriously disappeared. I find it hard to believe I spent 20 Euro for 3 hour gameplay on a game that has no replay value at all. Very disappointing. I would not recommend this to anyone.. Some bugs that can be annoying, but I'm willing to put up with it because it's made by a small team, the gameplay is pretty fun, and they're adding new content still (the game's still alive). All in all, I can't wait to see what it'll become. 80 hours and still no trading cards \u2665\u2665\u2665\u2665 this. Love this addon got my settings to where the game will run without to many lags running at 30 fps through the whole map. Settings are pretty high can see train run all objects etc.... Like the different routs and chronological events through out the year. Play this addon the most.

J Walter. Link to the official patch that allows you to enjoy the full game:

<https://the-last-sovereign.blogspot.com.br/vp/desecration-of-wings.html>. I loved this game and was excited to find it on here. However after I bought and downloaded it I found that I seem to have wasted my money as I am not able to play it. In town the graphics are splotchy but in the dungeons I am ONLY a shadow as are the creatures and any items.chest or vases are all invisible. If anyone can let me know if there is a fix for this I would appreciate it very much! Wasn't an expensive game but still disappointing to not be able to play it!
